THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. **PROSECUTION ON THE MERITS IS CLOSED.** THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE** OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Hsuan-Yeh Chang on 31 December 2009.

The application has been amended as follows:

Withdrawn claims 1-3 and 8 have been canceled.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

2. The prior art fails to teach a substrate for bioassay that has a reaction region formed on an upper layer of the substrate and an information region on the lower side of the substrate, wherein the lower layer is spaced from the upper layer in a thickness direction by at least a depth of focus of a laser beam and the reaction region and information region receive light from the lower side of the substrate, a fluorescence detection optical system having a first wavelength for irradiating the reaction region and a separate information recording/reproducing optical system having a second wavelength that irradiates the information region of the substrate.
3. Sheppard Jr. et al. (US 6,143,247) teach a substrate having a reaction region formed on an upper layer of the substrate and an information region formed on a lower layer of the substrate, wherein the reaction region is adapted so that sample material

and fluorescence marking agent are permitted to be dropped from an upper side of the substrate and the probe material is immobilized on the upper layer and the reaction region serving as receiving a laser beam from a lower side of the substrate and the information region receiving light from the lower side of the substrate. Sheppard Jr. et al. also teach the lower layer spaced from the upper layer. However, Sheppard Jr. et al. fail to teach the lower layer spaced from the upper layer in a thickness direction by at least a depth of focus of the laser beam, by specifically teaching that the thickness of the substrate is thinned sufficiently so that the presence of particles on the substrate interfere with the reading of encoded data using the optical detection system (col. 11, lines 53-60). The upper layer and lower layer being spaced by at least a depth of focus of the laser beam requires no interference to take place between the signal from the reaction region and the signal from the information region. Since the signal from the reaction region interferes with the reading of encoded data, the distance between the upper layer and the lower layer is not by at least a depth of focus of the laser beam. Sheppard Jr. et al. also fail to teach two separate light sources having different wavelengths, one for irradiating the reaction region and the other for irradiating the information region, irradiating the substrate from the bottom and instead teaches a single light source having the same wavelength for both irradiating the reaction region and reproducing data from the information region.

4. Virtanen (US 2001/0016316) teaches a substrate having a reaction region and an information region and also separate light sources for reading data and recording data on the substrate. However, Virtanen teaches the reaction region and the

information region are on the same side (top) of the substrate and the light sources irradiating the substrate from above the substrate. Therefore Virtanen fails to teach a reaction region on an upper layer of the substrate and an information region on a lower layer of the substrate wherein the upper layer is spaced from the lower layer in a thickness direction by at least a depth of focus of the laser beam.

5. It would not have been obvious to one having ordinary skill in the art at the time the invention was made to include two light sources as taught by Virtanen in the device taught by Sheppard Jr. et al. because the configuration of the reaction region and information region on the substrate in the two prior art references is different. Virtanen teaches a reaction region and information region both on an upper layer of a substrate and Sheppard Jr. et al. teach a reaction region on an upper layer and an information region on a lower layer of a substrate. Therefore one having ordinary skill would not look to Virtanen (which teaches two separate light sources irradiating an information region and reaction region from above a substrate, which is on the same side of the substrate as both regions), to teach two separate light sources in the device of Sheppard Jr. et al. which would require irradiating both the information region on a lower layer and a reaction region on an upper layer from the lower side of the substrate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
